

We work transparently; providing you with what we believe is the best new build experience available. The key to that is our Predict software.

This ground-breaking software allows you to view the progress of the build with unprecedented depth, and infinitely greater control than other systems.

- An online virtual shipyard, allowing the owner to view the build in real time
- No added percentages to outside contractors
- Negotiation on shipyard bids and yard contracts
- On-site quality control at all times
- Full cost transparency

**New Build**  
Bespoke, beautiful and built for you.

Diverse Projects is your full superyacht solution. The team have made it their business to answer your yachting needs and their collective industry experience means they anticipate your on-water wants.

They'll help you build your dream yacht, refit your existing yacht, or cement your perfect charter - and they'll also ensure you have the right people on that yacht, with the products they need to deliver the best end experience to you.

It's the Diverse way. Helpful, personal, flexible and comprehensive; providing as much or as little assistance as you need.

Recent Diverse Projects include Black Pearl, Satu, Adagio, Northern Light and others, with new build clients seeking us out from around the globe.
