

Our refit services have been successfully used by a number of high-profile yachting clients for comprehensive refits.

Collating and following the many small tasks that form a refit, we're able to flag potential issues long before they surface which means our refits are well-budgeted and impeccably managed. Diverse Projects' work is set apart by the use of our Predict Software.

**Refit**  
On time and within budget

Our superyacht refit and repair experts have the knowledge and connections to see your project finished on time, and within budget.

Our team are project management experts who work extensively within New Zealand and around the world to deliver seamless survey, warranty work and refit. While many of our clients prefer for us to work from their chosen yard internationally, our base in the heart of Auckland's Viaduct Harbour means we're also well-placed for you to sail virtually to our door for work to begin.

Make your next yard period an easy, well-organised experience, with Diverse Projects' refit service.

“Warranty work, survey work, improvements and finessing; take the stress out of your next yard period.”
